

Applications

- Powder industry
- Adsorbent (zeolite, molecular sieve, activated carbon, silica gel, activated alumina, etc.);
- Catalyst (platinum, palladium and other metal catalysts, etc.);
- Ceramic materials (alumina, zirconia, silicon nitride, silicon carbide, quartz, etc.);
- Battery materials (lithium manganese oxide, graphite, polymer battery materials, alkaline materials, etc.);
- Magnetic powder materials (iron oxide, ferrite, etc.);
- Nano-powder materials (ceramic materials, metal materials, silver, iron, copper, tungsten powder, nickel powder and metal powder);
- Environmental Sciences (sediment, suspended solids, etc.);
- Others (such as ultra-fine fibers, porous fabric, polymer composites, etc.).
